Total Customer Satisfaction

**Where quality comes first...**

## **The mission**

"To achieve total customer satisfaction through reliable quality, excellent services and timely delivery."

When it comes to consistent quality, one name stands out prominently and that is Techno Circuit Systems.

A company that has been continually working hard for the best of PCBs since last 12 years.

Quality is the way of working at us. Perfect planning, flawless execution and a widespread vision took us to this huge platform of about 7000 sq. ft. from a mere SSI. The foresight of Mr. Hemant Darawade, founder and owner of the company, made us to achieve this mark of a leading manufacturers of all kinds of PCBs.

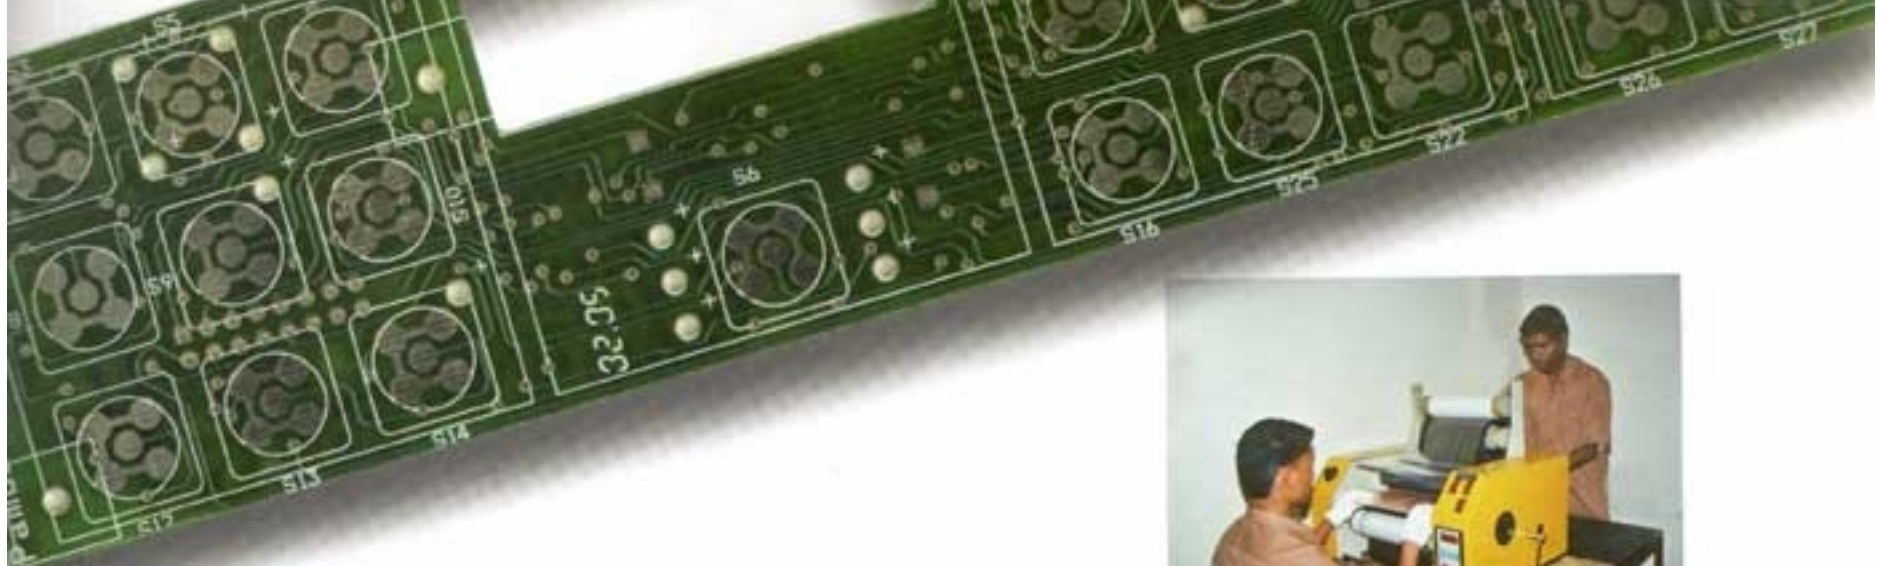

PCBs are known as the heart of any electronic device. This part of the device decides the efficiency. We have developed the finest systems to design and manufacture the top class PCBs.

The quality is just at par to match the international standards. Presently we are dealing with almost all sectors of the industry viz. Automobile, Electronics, Electric, etc.

Single sided, Double sided PTH PCBs duly SMOBC HAL, PISM / Thermal, Solder Masked etc. are some of the types we manufacture.

### The facilities:

Hi-tech and latest machinery is used for the manufacturing.

The ongoing process of bettering the standards is the major task of our strong R&D Department.

### Ultra-modern

### Machineries :

CNC drilling/routing/  
programming M/C.

Semi-automatic plating line.

Dry film laminator,

Exposing & Developing M/C for  
high resolution image transfer,

Alkaline etching system.

Stripping M/C and

Hot air leveling M/C, etc.

### Dry Film Laminator

This process is used for laminating the PCB with Dry Film Photoresist. It ensures sharp and dimensionally accurate image transfer. Line width and spacing -6 mil (0.15 mm)

### CNC Drilling / Routing / Programming Machine

CNC Drilling Machine with variable spindle speed up to 60,000 RPM for high position accuracy and good repeatability. It produces consistent burr free drilled PCB panels

### Hot Air Leveling Machine

SMOBC PCBs are hot air leveled to achieve excellent solderability and smooth finish, suitable for assembly of SMD components.

Mr. Hemant Darawade  
a journey from downs to up....

Neither a fiction nor a story, but it is a journey of a helper to become the owner of a huge set up. Mr. Hemant Darawade, owner of TCS, has an amazingly inspiring career chart, setting an idol to many young entrepreneurs. He has literally lived his dream. Not so good financial conditions of his family made him start his career at an early age as a helper in a PCB manufacturing company.

With his talent and his awesome grasping ability, he then progressed upto the Production Controller. One fine morning, he just walked out of the company to set up his own PCB manufacturing company. Then there was never looking back. His vision, his dedication and amazing decision making ability, his dream shaped up in sprawling 7000 sq. ft. area to manufacture the excellent quality PCBs.

Today, his quality consciousness has made his company a landmark PCB manufacturing company in the field.

### Steps towards a bright future....

.....  
In the process of installing **BBT**  
.....

To manufacture **multilayer** PCBs  
.....

To acquire an **ISO 9002** Certificate  
.....
